NEWS – Transports overlapping in Forwarding module

We have improved new transports input in FORWARDING-module.

In case of adding a new shipment which overlapping an existing one, the user will be notified by a pop-up window where a confirmation of agreement is required.

The screenshot displays a web-based shipping management interface. The top navigation bar includes links for Dispečník, Statistika, Nástroje, Spedice, Nastavení, Oblíbené, and Admin. The main content area shows two shipment records, one above the other, both for the same vehicle (6AX 1980) and with overlapping dates (11.03.2019 14:09:00 to 16.03.2019 23:59:00).

The first shipment record is titled "WDFMV206-002 OL-OL-ŠI 3D test tab4 - Přeprava". It shows a status of "probíhající" (ongoing) and was sent on 11.03.2019 at 11:04:54. The driver is listed as "...".

The second shipment record is titled "WDFMV206-003 OL-OL-ŠI 3D test SAM - Přeprava". It also shows a status of "probíhající" and was sent on 11.03.2019 at 11:19:27. The driver is listed as "Procházků Martin (332)".

At the bottom of the interface, there is a confirmation dialog box titled "malikwag1". The message in the dialog reads: "Plánovaná přeprava se překrývá s přepravou: WDFMV203. Opravdu chcete uložit přepravu?" (The planned shipment overlaps with shipment: WDFMV203. Do you really want to save the shipment?). The dialog has two buttons: "ano" (yes) and "ne" (no).

NEWS – User points appearance setting

We have expanded User points options so that it can be **filtered by category and by the date (from – to) when the vehicle can be parked.** It only refers to User points filtered as a Parking spaces.

At the same time we have added those items to the **User points appearance setting** so that the user can choose whether or not to see these items in the filter.

NEWS – WD Fleet 3D

We will launch a new version of WD Fleet 3D in April, when the support of 1:1 route transfer will be introduced for the first time.

Please note the Sygic association has terminated 2D navigation support for Android 8 and above.

Therefore, we recommend that you do not upgrade your device to Android 8 or higher. As a solution we offer a new version of WD Fleet, it's WD Fleet 3D which supports new Sygic 3D maps they are compatible with Android from version 4.4.

CONCLUSION

We believe that you have found useful information in this magazine, to make it easier for you to work with Webdispecink application

Thank you for being with us
