New filter in Check of costs statistics

For easier searching costs for electric, plug-in, etc., a filter for Vehicle Type has been added to the Check of Costs tool.

The tool can be found in Tools/Fuels/Costs.

Dispatching | Statistics | **Tools** | Forwarding | Settings | Favourites | Support | Admin

Tools » Fuels » Check of costs:

< 1.4.2025 00:00 31 30.4.2025 23:59 31 > Show

Group: all groups ☐ including subgroups

Vehicle type: electromobile

Vehicle: all vehicles

New license plate number: ...

☐ Subdivide records by source
☐ display only cost in currency different from vehicle

Rearrange records to other vehicle
Delete indicated record
Bulk change

Legend:
✓ In order
⚡ Km data are not entered in costs
✗ Km data does not fit

NEWS – Travel expenses - new API function

A new API function `getTravelExpenses` has been created to download travel compensation.

API function is based on the Travel expenses compensation statistics – Tools/Compensation/Travel expenses compensations

[API version 2.0 - List of all functions - API Webdispečink](#)

The screenshot shows the homepage of the API Webdispatching website. The header is dark green with the logo and name 'API Webdispatching' in white. A search bar is on the right. The navigation menu is green with white links: Home, Partners, Guides, Examples, and Pricing. The main content area has a white background. The headline reads 'Make the most of the Webdispatching application for your website.' Below it, text explains that the API can implement functions from the Webdispatching application to server pages, uses SOAP (XML) technology, and is demonstrated in PHP5 examples. A link to 'licence terms' is provided. On the right, a computer monitor displays a web application with a map and a data table.

API Webdispatching

Home Partners Guides Examples Pricing

Make the most of the Webdispatching application for your website.

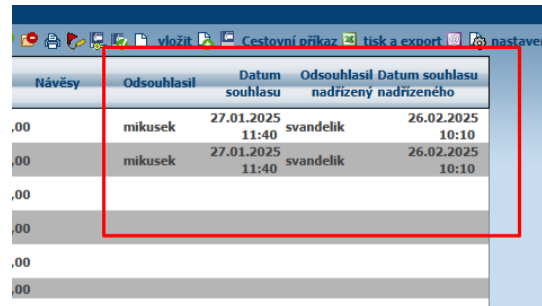

By using the Webdispatching API you can **implement some functions from the Webdispatching application** to the pages running on your server.

SOAP (XML) technology is used for communicating between the applications.

The set of API Webdispatching functions is demonstrated in the examples in PHP5 programming language. The use of the Webdispatching API is governed by the [licence terms](#).

NEWS – New column in Vehicles statistics

Added new column "Log book confirmation status" to Vehicle statistics (Statistics/Summaries of vehicles/Vehicles.) The value of this column is automatically derived from the data in the log book – it tracks confirmation from the driver and supervisor approval.

NEWS – New version of WD Fleet 1.9.0 application

In the new version 1.9.0 we have fixed some minor bugs in the application (displaying files, sending messages, etc.).

The main change, however, is the update of the Sygic navigation libraries to the newest version 24.5.3.

New version has improved route calculation algorithm, solves the error of route calculation to places that are not yet drawn in the maps, the occurrence of school zones and mainly improves the operation traffic information.

END

We hope that you have found useful information in the articles in this issue of the magazine that will make working with your fleet even easier.

Thank you for your trust.
