NEWS - Addition of paternity leave

The tool Driver-absence has been extended to include a maternity leave.

The change is also incorporated in the detailed listing (button "Switch to detailed listing"), editing of the existing record and also in the creation of a new record.

NEWS – New import bridge for transactions about recharging Chargee

We added a new import bridge from the Chargee system.

Chargee has also been added as a new card type. Pairing of costs is done by using cards as well as vehicle registration numbers.

NEWS – New version of the WD Fleet app 1.6.0

In the new version 1.6.0 we have processed your requests and made corrections leading to higher stability of the application.

NOTICE – Automatic import of costs from Slovnaft cards

In case you use automatic import of costs into Webdispatch from Slovnaft cards, it is necessary to insert fuel cards into Webdispatch and pair them with vehicles. In case you do not have this set up, the transactions will not be paired. The new pairing of transactions is done by card number. If you have any questions, please contact technical support.

News – WD Fleet - guide to update application and Sygic maps

The Sygic map data in our WD Fleet app are crucial for the correct navigation of the driver to the loading/unloading point.

Updates of map bases of Sygic navigation should be done regularly every three months (the company Sygic issues them in 3., 6., 9. and 12. months). Now, the version of maps 2023/03 is available.

This is why we recommend checking availability.

We've prepared a 5-step guide on how to do the update. The procedure is suitable for your personal as well as EW image tablets.

END

We hope that you have found useful information in the articles in this issue of the magazine that will make working with your fleet even easier.

Thank you for your trust.
