NEWS – Car rental 2.0 – possibility to change the vehicle

For copied reservations, you now have the option to change the vehicle. The parking space is also transferred when the reservation is copied.

If you change vehicle, the parking space is reset and must be refilled again.

NEWS – New version of the CAR SHARING application - 1.5.5

What's new:

In the ongoing rental in mobile application, we have adjusted the display fuel cards and their PINs.

Previously, only one card and her PIN were displayed for each vehicle.

We now display in the mobile application all vehicle fuel cards that are active in Webdispecink, have a PIN entered and are valid either unlimited (not specified) or in the future.

We have added a dialogue to the mobile application that allows the user to proactively notifies you when newer version of Car Sharing application is available on Google Play or App Store.

Once you have completed your reservation, you will be automatically redirected to the reservation overview screen.

We have improved the logging in the mobile application for more detailed analysis of any Bluetooth communication problems between mobile application and in-vehicle unit.

NOTICE – Browser updates will slow down Webdispecink

After updating Microsoft Edge, Google Chrome is experiencing that **some components on webdispecink.cz pages are drawing slower than before.**

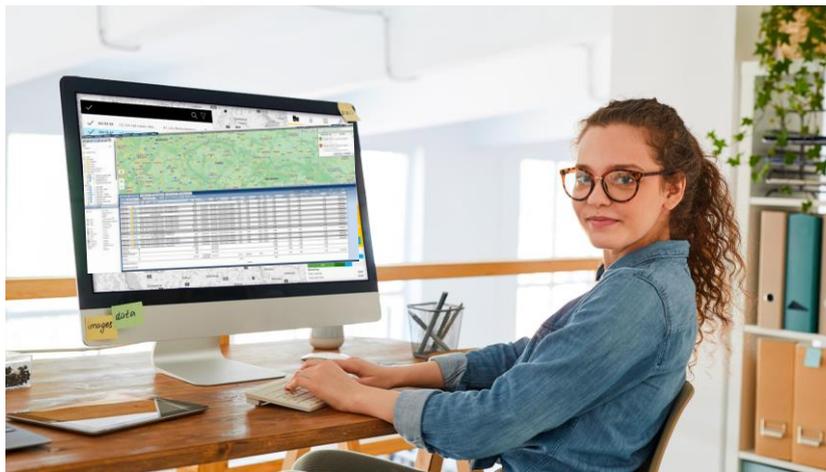

This is due to an error in browser core update. The manufacturer has already reported the problem and is preparing a fix.

We don't know yet when the fix will be published.

We recommend that customers temporarily use Firefox, where this problem does not occur, or install an older version of Edge, Chrome.

We are looking for other temporary alternative solution.

Thank you for your understanding.

END

We hope that you have found useful information in the articles in this issue of the magazine that will make working with your fleet even easier.

Thank you for your trust.
