## NEWS – Increased the security of user accounts

We have increased security for your accounts.

Now there must be a **unique e-mail for each user** in within Webdispecink.

So keep this in mind when setting up new user access.

Each user can also check the authentication in their personal settings. If a **green check mark** appears next to the email - the email has been verified.

Email authentication is optional for users of the Webdispecink mobile application and WD Fleet mobile application or for access via the API.

If you need help, call technical support at 233 555 111.

### Ověření e-mailové adresy

Vážený zákazníku, pro využití našich služeb a zvýšení bezpečnosti vašeho účtu, prosíme o ověření vaší e-mailové adresy. Díky tomu budete mít v budoucnu také přístup k vylepšeným funkcím, jako je výběr mýtného nebo palivové karty.

Pro ověření zbývá -1 dní.

Vaše e-mailová adresa:

# NEWS – New API function `_setTemperatureAlarms`

A new API function has been created to set temperature alarms, which are now available in the vehicle settings under the Temperature tab.

It is necessary to have the Trailers and Temperature Sensors package activated.

The screenshot shows the API Webdispatching website. The header includes the logo and navigation links: Home, Partners, Guides / API version 2.0 / The list, Examples, and Pricing. A search bar is located in the top right corner. The main content area is titled "Reference guide" and includes a "List of all functions" section. A table lists functions such as `_addUserPointRight`, `_connectionInfo`, and `createForecast`. Below this, a code block displays the XML request for the `_setTemperatureAlarms` function. The XML is as follows:

```
<Envelope xmlns="http://schemas.xmlsoap.org/soap/envelope/">
  <Body>
    <_setTemperatureAlarms xmlns="urn://api.webdispecink.cz/webdisser_02">
      <kodf>metro</kodf>
      <username>admin</username>
      <pass>          </pass>
      <carid>392212</carid>
      <temperatures>
        <temperature1>
          <alarmEnabled1>1</alarmEnabled1>
          <minTemp1>4.5</minTemp1>
          <maxTemp1>6.5</maxTemp1>
          <interval1>120</interval1>
          <alarmEnabled2>1</alarmEnabled2>
          <minTemp2>5.5</minTemp2>
          <maxTemp2>7</maxTemp2>
          <interval2>6</interval2>
        </temperature1>
        <temperature2>
          <alarmEnabled1>1</alarmEnabled1>
          <minTemp1>2</minTemp1>
          <maxTemp1>3</maxTemp1>
          <interval1>120</interval1>
        </temperature2>
      </temperatures>
    </_setTemperatureAlarms>
  </Body>
</Envelope>
```

# NEWS – We have released a new version of WD Fleet 1.9.1

## List of changes:

- Perfect Drive displays recommendations to improve the driver's driving style rating and makes the colors in the rating more legible
- in Traffic log you can see the results of completed actions at the stop
- improvements to the sending of navigation error logs

New Sygic 6/2025 mapping documents have also been released. You can update them directly in the Sygic application under the Manage Maps menu or download them at this [link](https://storage.sygic.com/tmp/FLEET/customers/Maps/EUR_TA_log_v9_00_2025_06.zip).

[https://storage.sygic.com/tmp/FLEET/customers/Maps/EUR\\_TA\\_log\\_v9\\_00\\_2025\\_06.zip](https://storage.sygic.com/tmp/FLEET/customers/Maps/EUR_TA_log_v9_00_2025_06.zip)

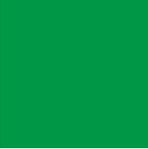

# NEWS – Automatic recalculation of statistics Hours worked according to D-8 tachograph

Automatic re-generation will place once a day and the re-generated records will be marked with a green icon

directly in statistics Hours worked according to D-8 tachograph.
