NEWS – Alarm – Checking the status of inputs outside of user locations

Introducing the new feature of triggering an alarm when an input is used (e.g. opening a box, filling a tanker) outside of its user location.

The settings are available in Settings - Vehicles – Vehicles on the Alarm tab.

Caution: We do not have control over duplicate insertion of the same user location.

You can find the triggered alarms on the main screen of Webdispecink on the Incoming messages tab and you need to click "Show all messages".
