NEWS – Advanced filtering options in the Check refueling and recharging statistics report

In the Fuels/Check refueling and recharging report, we have expanded the data filtering options.

A new filter is now available Vehicle type, which allows you to select multiple vehicle categories at once.
This makes it easier to compare and analyze data across different types of fleets.

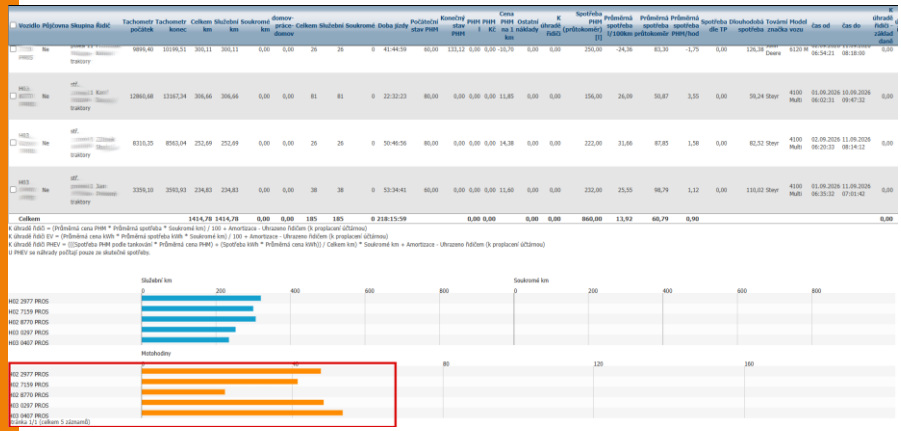

At the same time, we have expanded the use of the Charging deviation filter.
This filter can now also be used when viewing a list of multiple vehicles, so it is no longer necessary to select just one specific electric vehicle.

NEWS – New engine hours chart in vehicle statistics

As part of the improvements to the Vehicle Statistics overview, a new engine hours chart has been added, which allows for clear monitoring of vehicle usage in terms of worked engine hours.

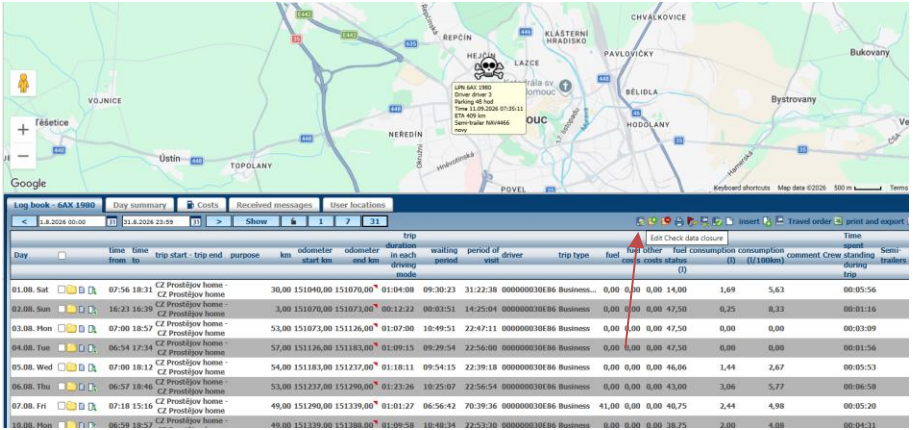

Notice:
For the data to appear in the graph, the vehicle must have engine hour display enabled in the vehicle settings.

NEWS – Quick access to Check data closures

On the main Dispatching tab, a new icon has been added to the Log book that allows you to quickly open the "Check data closures" tool.

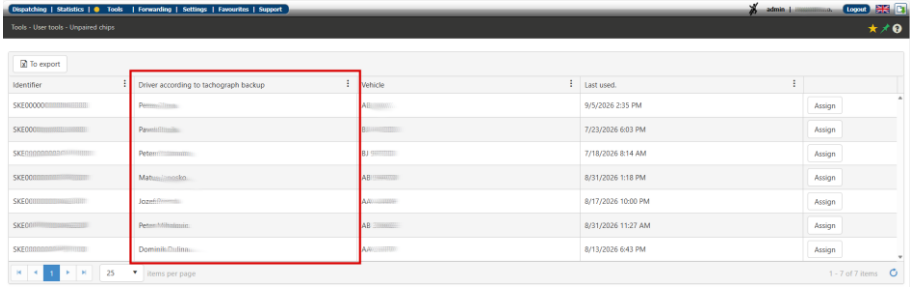

Only users who have permission for the "Check data closures" agenda can see the new icon. This permission is configured in Settings/Users/Display agendas for users.

NEWS – New column in the Unpaired chips statistics

A new column, “Driver by Tachograph Download,” has been added to the Unpaired chips report (Tools/User Tools).

This column displays the driver identified based on data from the tachograph backup, which makes it easier to identify the person who was using the vehicle in the event of unpaired chips.

NEWS - Free webinars are now available directly in Webdispecink

On the homepage of Webdispecink, a new section called Free Webinars has been added, providing convenient access to online training videos.

After clicking the Free webinars button, you can view the available videos and expand your knowledge of how to use the system.

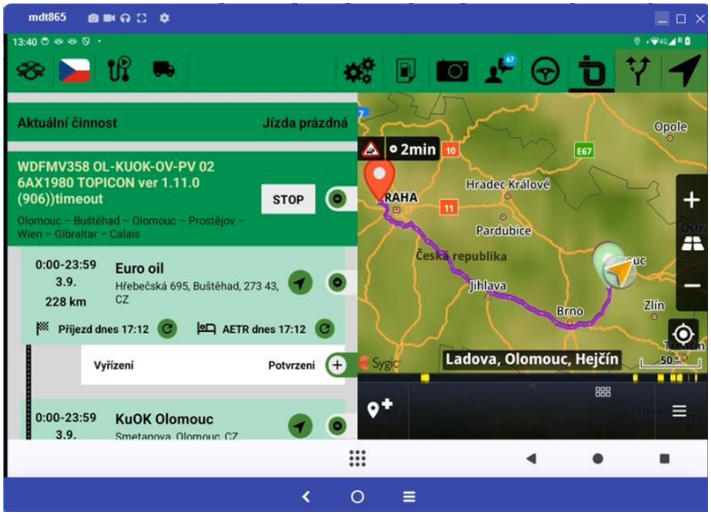

NEWS – New version of the WD Fleet app 1.11.0

We have released a new version of the WD Fleet app, version 1.11.0 (9070).

You can find a detailed description of the changes in our magazine World Webdispecink 7/2026.

Here is a brief overview of the changes:

1. **Perfect Drive – display user-defined recommendations for drivers**
2. **Customizable time limit for AETR breaks (8-30 minutes)**
3. **Updates and stability improvements for Sygic navigation 26.0.7**

NEWS – New version of the Webdispecink mobile app 2.7.0

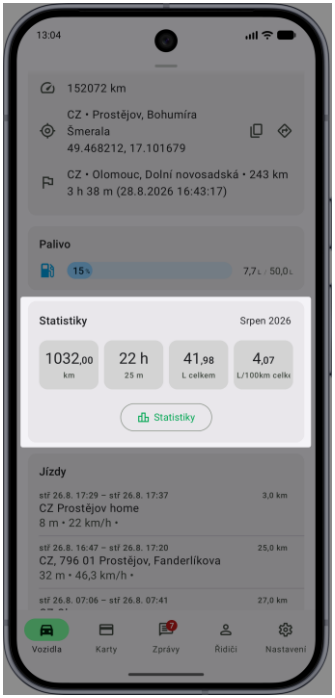

A new version of WD Mobile, 2.7.0, is available on Google Play and the App Store.

Android

- **Statistics** showing distance, travel time, fuel consumption, and average fuel consumption.
- Improved Bluetooth reliability and fixed the issue of connecting to multiple vehicles at once.
- Fixed the issue of opening vehicle details from a push notification.
- Fixed an issue with logging in as a driver/passenger via a notification.
- Bug fixes and performance improvements.

iOS

- **Statistics** showing distance, travel time, fuel consumption , and average fuel consumption.
- User interface bug fixes and performance improvements.

END

We hope that you have found useful information in the articles in this issue of the magazine that will make working with your fleet even easier.

Thank you for your trust.
