NEWS – New column Centre

For better clarity, we have expended exports of the Short version of log book (single file) and the Detailed version of log book (single file) to include a new column titled Centre.

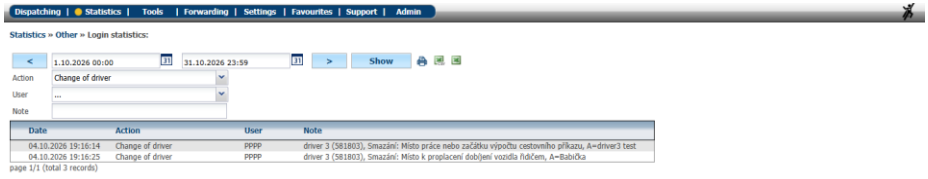

NEWS – New feature in Logs statistics

The Logs statistics (Statistics/Other) have been enhanced with a new action, Change of driver, which allows you to track changes to selected driver attributes.

As part of this update, changes to the following data are now logged:

Group
Personal ID number
Center
Division
Work place or starting point for travel order calculation
Location for reimbursement of vehicle charging by the driver

Note: The location where the driver recharges the vehicle for reimbursement is also logged in a separate transaction titled "Change your home charging location".

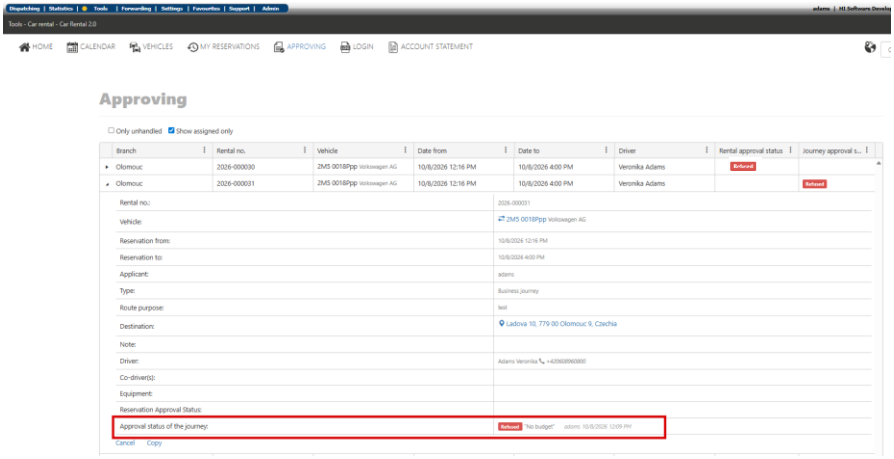

NEWS – Automatic rejection of a rental if the trip is not approved

For clients using the Car Rental service and its two-step approval process, we have modified the process for rejecting journeys and rentals.

If a trip is rejected now, the associated rental will also be automatically rejected. The purpose of this change is to prevent situations in which a rental would be approved for a trip that has already been rejected and will not take place.

When a journey is rejected, the reason for the rejection is now recorded.
The rejection reason is displayed in the approval table.
At the same time, the name of the user who rejected the journey is also recorded and displayed.

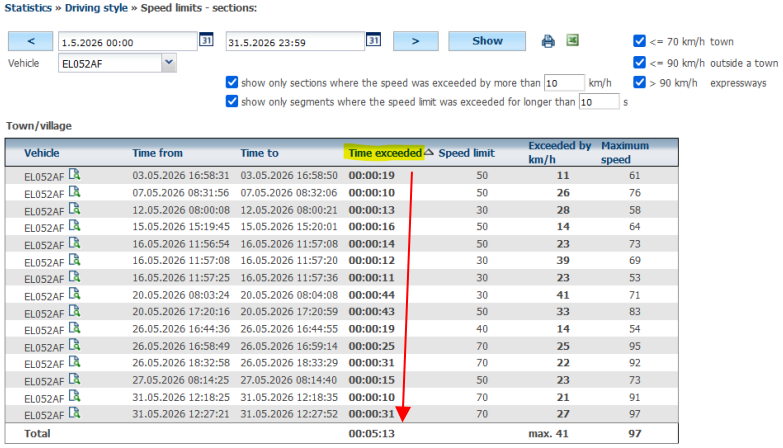

NEWS - Speed Limits – Sections

In the Driving Style/ Speed Limits - Sections statistics, the filtering options have been expanded and the list of speeding violations has been made clearer.

Newly, you can choose to display only those sections where the speed limit was exceeded by more than a specified number of km/h, or only those sections where the speeding lasted longer than a specified number of seconds.
Short and insignificant speeding incidents will therefore not appear in the statistics at all.

Each entry now includes an icon for displaying on a map. When you click on it, the entire route is displayed, and the slider automatically moves to the beginning of the section where the violation occurred.

A summary row ,Total showing the total duration of the violation has been added, and it is also possible to sort the list by the Duration of Violation column.

NEWS - Costs – new column Paid by driver

Until now, information about the driver's payment has been displayed only via an icon next to each expense.

This information is now also available as a separate column, which you can view in the overview and use to filter records.

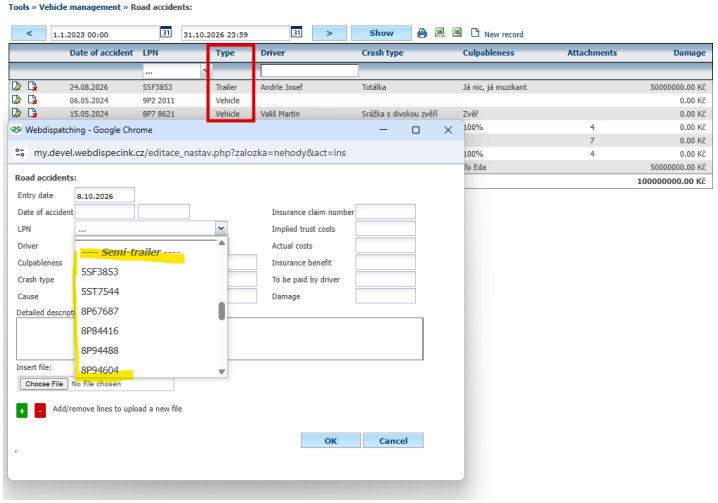

Tools/Fuels/Costs

NEWS – Road accidents – option to select semi-trailer

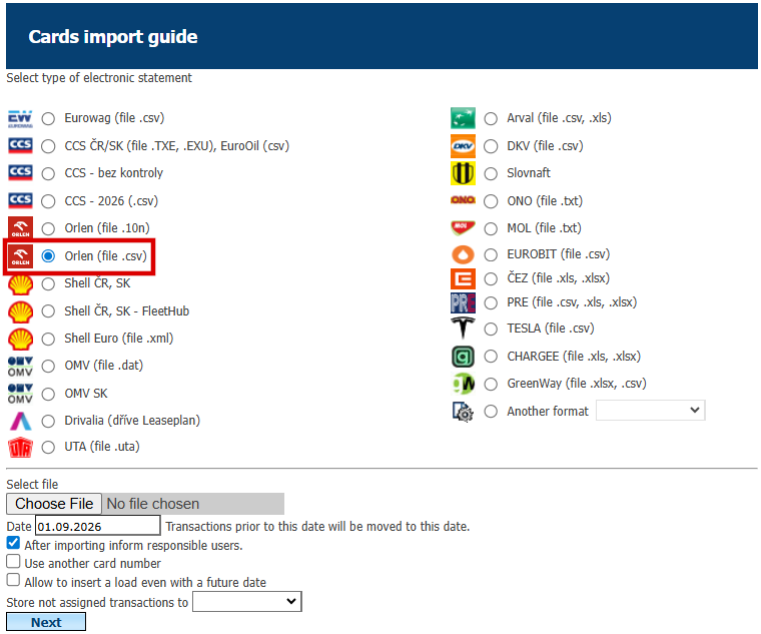

To Road accidents tool (Tools/Vehicle management), the option to select semi-trailers in the LPN has been added.

Semi-trailers will only be displayed if the "Semi -trailers and temperature" package is active.

NEWS - Orlen - import Fuel data in csv format

Support for the .csv format has been added for importing transactions for Orlen.

END

We hope that you have found useful information in the articles in this issue of the magazine that will make working with your fleet even easier.

Thank you for your trust.
